

WHY SHOULD YOU CHOOSE

Heating & Air Conditioning

- ✓ The most efficient line of furnaces ever made. Up to 98% AFUE
- ✓ Cutting edge two stage out door equipment.
- ✓ 100% assembled in the USA
- ✓ The most efficient heat pump for heating up to 10.1 HSPF
- ✓ Fully Modulating furnace offers 100 stages of comfort
- ✓ More combinations than any other brand that will qualify a customer for a federal tax credit.
- ✓ Extensive on line and classroom training so my technicians are always trained and ready.
- ✓ The most efficient line of indoor air quality products available.
- ✓ Some of the best equipment sound ratings in the industry.
- ✓ 10 year parts warranty and an extensive offering of labor warranties.
- ✓ As an HVAC contractor we can sell most any brand. We choose to sell Coleman because it offers us the most solutions to fit the needs of today's well educated and discerning consumers.

Heating & Air Conditioning

The first name in comfort, quality, and innovation since 1901

1901

W.C. Coleman, a man with poor eyesight, but great vision, invents the first Coleman lantern

1925

W.C.'s son Sheldon joins the company with a degree in mechanical engineering and understanding of creating light through combustion. He decides to transfer this knowledge to home heating to further diversify the company's products.

1934

Coleman starts producing gas floor furnaces and oil space heaters under the Coleman brand name.

1981

Coleman extends its product offering for the residential commercial HVAC market.

1996

York International, a Fortune 500 HVAC manufacturer known for innovation, purchases Coleman.

2004

Coleman HVAC introduces the Echelon residential line; the quietest most efficient heating and cooling products the industry has ever seen.

2005

Johnson Controls, the worlds leader in controls, purchases York/Coleman investing millions in product design and development.

2007

Coleman introduces the most efficient gas furnaces and heat pumps ever made to the residential market.

2009

Coleman moves all product assembly back to the US. Continuing a tradition of US quality, innovation and American made durability.
